

Evaluering af Train-the-Trainers workshop 'RDM as a wicked problem' 13. oktober 2016

18 deltagere har udfyldt evalueringsskemaet – 4 har ikke.

Vurdering på en skala fra 1-5 (1 = poor og 5 = excellent):

Kommentarer fra deltagere:

- Godt og nyttigt at møde også andre end "the usual suspects" :-)
- The workshop provided me with a very nice setting for reflection of how we implement RDM and thoughts about how this could be done better. I believe that the workshop was very good. For my account this type of workshop could have been placed earlier in the lifespan of DM forum. Finally I hope DM forum will organize more events like this - this is what we should spent time on sharing exp, and make reflections about the problem space in common.
- - Super med miks mellem oplæg + workshop - Vi fik nogle relevante diskussioner - Der kunne måske godt bruges lidt flere små pauser i programmet til en anden god gang
- I unfortunately had to leave early, so my experiences are based on the meeting start.
- As a librarian working the field of humanities, it was very interesting to hear the experiences of the natural science and technical science areas, but sometimes also a bit abstract, as we are not that hand on with the area of RDM yet.
